## The art of clean lines

A handle that is pleasant to touch each time you turn the water on. An operating element with a uniquely fine appearance. And clean lines that promise hygiene.

Soft edge is the name of the game for this contemporary design: it gives softer forms to mixer bodies and surfaces, rounds corners and edges and thus results in balanced silhouettes. KLUDI E2 is there to give you a friendly, uncomplicated welcome with a fresh atmosphere – in your new bathroom.

## The right version always at your fingertips

Lightness lies in the lever of this mixer the operating element is just a few millimetres thick and is an elegant example of how to obtain a precise flow of water.

In terms of practicality there is a variety of spouts too: VersatilityPlus is KLUDI's concept to make planning and using the washbasin area easier. Thanks to different length spouts and four different heights, the series will satisfy the demands of any washbasin area.

## More VersatilityPlus beneath the spout: there's space here to wash more than hands

If you don't just use your washbasin to wash your hands, you should get to know the KLUDI VersatilityPlus concept. The high-spout, single-lever mixers score top marks if a fitting is occasionally used to wash hair or to fill vases or buckets, say.

These generously proportioned models go particularly well with modern washstands. Maximum flexibility is required from countertop washstands and washbasins. The KLUDI VersatilityPlus concept with its range of spout heights and lengths provides the ideal solution.

The VersatilityPlus models of the KLUDI E2 come in spout heights of 80 mm, 120 mm, 155 mm and 272 mm. They are the flexible solution for every modern washbasin.

## Mixers for your home retreat

The mixer shows off its sensory qualities on the bath. The bath represents your retreat within your own four walls – and KLUDI E2 bath mixers set the backdrop for this oasis of relaxation. There are two ways to use the mixer – toggle by pushing/pulling the knob. On the one hand, the high-flow bath filler to run the bath quickly. And on the other, the handset for showering in the bath or rinsing off after washing your hair.

Whether for a free-standing bath or mounted on the wall: The KLUDI E2 bath mixers are also in keeping with the design series, which is classed between pure minimalism and organic form.

## Emerge from your shower invigorated

The shower stands for vim and vigour – the KLUDI E2 line for this area of the bathroom is diverse and ranges from the convenient concealed model to the pragmatic surface-mounted version. Every design wish, every functional requirement and even special requests can be satisfied.

Would you rather a lavish overhead shower for an impressive cascade or a handset for flexible showering? All necessary fittings are available in the characteristic soft-edge design; even details like the wall union for the shower hose attest to the design features. Then there are matching shower rails and hoses – in short, everything needed to design a custom bathroom.

The wall-mounted version of the KLUDI E2 shower/single-lever mixer is a design highlight.

# KLUDI E2 Accessories

There is a place for everything – and mixing styles is avoidable – as there is a high-quality line of accessories in the soft-edge design to match KLUDI E2. Chrome-plated metal and hand-blown opal glass show off the lines of KLUDI E2's design to advantage: Towel holders, soap dispensers, toilet paper holders, tooth mugs – for a uniformly customised bathroom.
